Common Name: _____

Scientific Name:

_____

Size: _____

What lifecycle stage was the amphibian in when you found it?

_____

Describe the amphibian's special markings or colors:

_____

_____

Is it a frog, toad, newt, or salamander? *(Circle one. Frogs have smooth, wet skin and must be near water; toads have bumpy, thicker skin that doesn't feel moist. Salamanders are smooth and slimy, like frogs. Newts are rougher and not slimy, more like a toad.)*

The adult is: *(circle one)* semi-aquatic *(spend some time in water, some on land)*
terrestrial *(Spend most of their adult life on land. They stay moist, living in moist surroundings.)*

Habitat:

_____

_____

Food:

_____

_____

Where and when we saw this amphibian:

_____

Interesting facts about this amphibian:

_____
